Announcement of Distribution Agreement Between BROSCO and WASCO Skylights

BROSCO is pleased to announce that it has entered into a distribution agreement with WASCO Skylights of Sanford ME and will begin distributing the product on May 1st, 2010.

WASCO has been building quality skylights since 1935 and currently have been supplying their products on a direct basis to dealers throughout the northeast. This change in distribution method will create faster delivery and reduced freight costs. These savings will be passed along improving profitability for the day-lighting solutions available to you and your contractor customers

BROSCO will begin accepting orders for the WASCO product line May 1st, 2010. We will be stocking Wasco's E-Series fixed and venting skylights. We are excited to present the product line to you.

- The E-Class Skylight, the easiest skylight to install with a Leakproof Warranty
- Residential Skylights with 30/30 glass that qualify for the Federal Tax Credit program
- Custom size skylights made to fit existing openings

Your BROSCO Sales Rep will be introducing this new product line, pricing and exciting stocking/displaying dealer opportunities to you soon.

BROSCO looks forward to this new partnership with Wasco Skylights and the opportunity to service you and your customers!

Tim Lyons

VP Sales & Marketing
