

Dialogue Layered Glass

Playful interaction and dynamic privacy.

Dialogue takes on a personality of its own as layers of glass interact with one another, with light and with movement. Each of the line's six ceramic frit patterns change form and move as light or a person's vantage point changes. Patterns come to life, shapes are revealed and shadows dance as light and movement engage in a dialogue with the glass. Dialogue layered glass creates dynamic privacy that changes, just as the doorglass patterns do, with light and proximity.

Privacy Level Scale

Six Ceramic frit patterns to choose from!

Banter

3 — 5

Banter's small-scale pattern of overlapping diagonal lines creates a woven design that zig-zags across layers of doorglass. From a distance, the fine "threads" give the appearance of fully frosted, textured glass that provide a low-medium privacy range.

Brainstorm

5 — 7

Appealing to both mid-modern and modern design sensibilities, Brainstorm's exterior vertical pattern and interior chevron motif combine for an appearance with both subtlety and substance. Brainstorm has a medium to medium-high privacy range.

Chatter

6 — 8

A repetitive pattern of dots and lines creates a doorglass design that reads as a texture. Chatter's shadow effect adds playful movement to a doorglass design with a medium-high privacy range.

Converse

7 — 9

What at first appears to be cut glass is a stencil design that hints of keyhole arches common in Moroccan architecture. The relationship between Converse's clear and frosted glass layers creates striking shadows and a high privacy range.

Repartee

7 — 9

Repartee's frosted layers and geometric grid combine for a design that plays with opacity and movement. Squares and trapezoids carry on a lively back-and-forth as light and vantage points change their appearance. Repartee offers a high privacy range.

Whisper

8 — 9

Refined and graceful, Whisper introduces calligraphy to a front door. The scrolled patterns and play between frosted and clear layers create gentle, quiet movement and a high privacy range.
