

Simulated Divided Light with Textured Glass

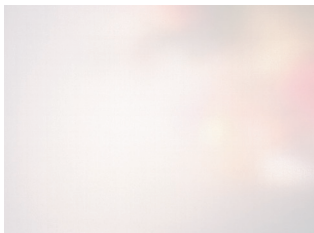

Practical and elegant take on traditional divided door lights.

New possibilities in our Textured Glass collection and Simulated Divided Light line give consumers the options they want in textured accents and privacy glass.

- Privacy glass combines a design-forward, unique look with high levels of obscurity.
- A mill finish spacer bar with the all-in-one SDL frame provides the look of a true divided light with the energy efficiency of a single light.

- Four Textured Glass Designs
- Privacy Rating: 9
- SDL with Spacer Bar
- Contoured Grille Bars in Traditional Style 1-1/8" or Craftsman Style 7/8"
- Design-Pro and Smooth-Pro
- Factory order, refer to BROSCO XPress for availability.
