

## Dartmouth Rail (RS35)

### A Classic and Elegant Rail Profile with Modern Characteristics

- Commercially code approved for 12' spans with heavy-duty aluminum
- Standard kits ship with solid 1 1/2" square-edge balusters
- Our Dartmouth Peaked profile was designed with traditional wood and historical charm in mind. Enjoy these characteristics without the rot or warp of wood!
- Meets commercial requirements of International Building Code (IBC) and International Residential Code (IRC) for level spans up to 12 feet and stair spans up to 8 feet.

### Rail Assembly Jig

Our reusable rail assembly jig is designed specifically to help reduce installation times and labor cost. The Assembly Jig makes it easier to align, center and space balusters.
