Introducing 1-Panel Primed Decorative Doors

In Stock!

Not Too Modern. Not Too Traditional. Just the Right Amount of Detail.

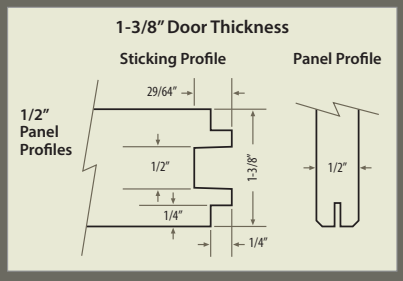

Frameport's PR-11D Decorative Panel door starts with the clean, timeless lines of a Shaker door and adds a distinctive step detail along the sticking. The result is a fresh, refined design that brings more character than minimalist styling without the ornate detailing of traditional doors.

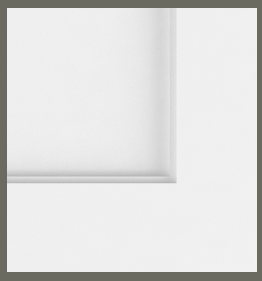

Its transitional aesthetic allows the Decorative Panel to complement a wider range of interior styles. It adds a touch of flair to contemporary spaces while fitting naturally into more traditional and detailed interiors.

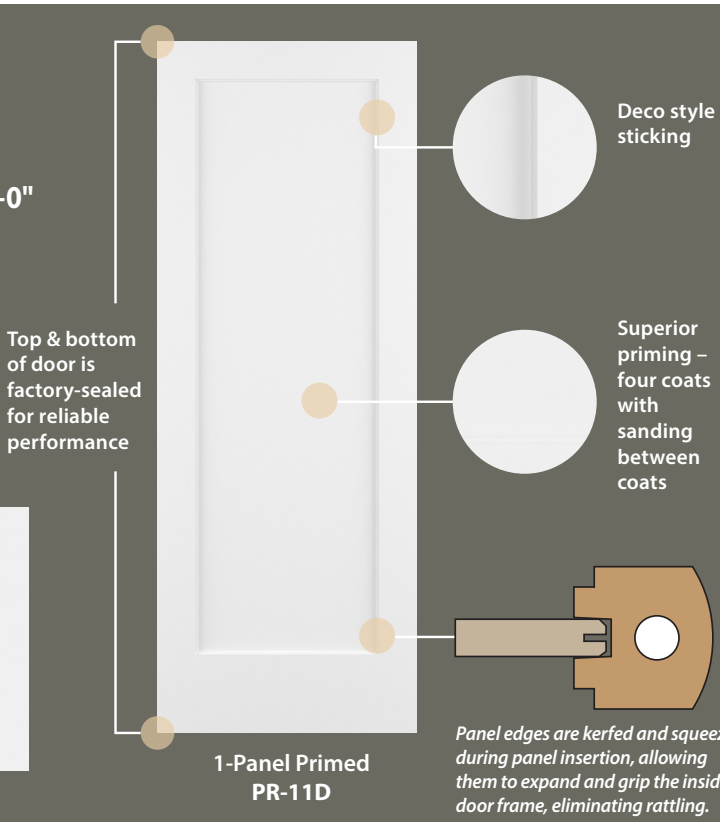

Clean lines. Distinctive detail. Versatile style.

Features & Benefits

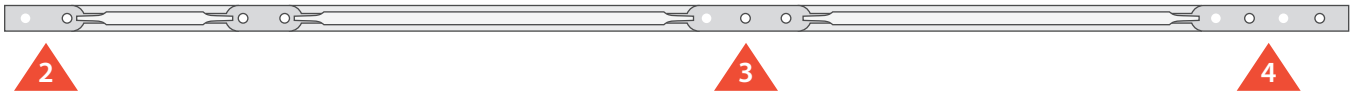

The Superior Case for FRAMEPORT Doors

Features	Benefits
Tops and bottoms are factory sealed to prevent moisture absorption	Eliminates the top reason for product claims
Vertical grain	Uniform finish, no visible veneer splices
Superior panel thickness	Full 3/4" vs 1/2" - 9/16". Deep rich appearance, improves noise reduction
The panels are contoured fitted to prevent shifting after finishing	No evidence of unsightly lines
Vertical grain slat 1/4" vs. 3/16"	More stable, significantly reduces warping
All components are primed prior to assembly	No unpainted surface to show through. More consistent finishing
Engineered LVL (Laminated Veneer Lumber) bifold stiles	Will not warp. No unsightly finger-joints
Wide edge band	Doors are trimmable on the edge beyond 1/4". Frameport uses 3/4" edge band so trimming 1/2" off each side is possible.
Each door is individually polyolefin wrapped; can be pre-hung in the plastic	Door remains clean in warehouse or on the job. No dust, no oily fingerprints.
5-Year Limited Warranty	Other manufacturers typically offer a 1-year warranty
More dowels per rail (see below) **Top: 3 vs. 2 Lock: 5 vs. 3 Bottom: 6 vs. 4**	Stronger, more stable construction. Eliminates separation
